

SAINI NEXUS

Website Product Requirements Document

Project: Saini Nexus Official Website

Primary Objective: Build a premium, distinctive B2B marketing website that establishes Saini Nexus as a leading marketing company in Rajasthan while building long-term organic search authority across Jaipur, Rajasthan, India and international B2B markets.

1. PRODUCT VISION

Build a website that feels like a **serious B2B growth company**, not a generic digital marketing agency.

The website must communicate: **Strategy + B2B Expertise + LinkedIn Expertise + Creative Thinking + Measurable Growth.**

“This is not another generic marketing agency.”

2. BUSINESS POSITIONING

Primary positioning: Saini Nexus is a B2B marketing and LinkedIn growth company based in Jaipur, Rajasthan, helping businesses turn LinkedIn into a measurable channel for lead generation, demand generation and business growth.

Core services

- B2B Marketing
- LinkedIn Marketing
- LinkedIn Ads
- Thought Leader Ads
- B2B Lead Generation
- Demand Generation
- LinkedIn Advertising Strategy
- LinkedIn Campaign Management
- Audience Targeting
- LinkedIn Growth
- Founder-Led Marketing
- B2B Growth Strategy
- SaaS Lead Generation
- Corporate LinkedIn Growth
- LinkedIn Campaign Audits

Do not present these as an undifferentiated list. Group them into a strategic system.

3. PRIMARY BUSINESS GOALS

Goal 1 — Brand

Position Saini Nexus as a **premium B2B marketing and LinkedIn growth company from Rajasthan**.

Goal 2 — SEO

Build strong organic search visibility for Rajasthan, Jaipur, India and international B2B searches.

4. SEO STRATEGY

The SEO objective is not to put “Rajasthan” and “Jaipur” repeatedly on every page. Build a semantic website architecture where Google can clearly understand:

Saini Nexus → B2B Marketing Company → Jaipur, Rajasthan → LinkedIn Marketing + LinkedIn Ads + B2B Lead Generation + Demand Generation → India + International Markets

Build genuine topical authority around these subjects.

5. MOST IMPORTANT DESIGN REQUIREMENT

DO NOT BUILD A GENERIC AI-GENERATED WEBSITE.

Avoid generic gradient blobs, floating glassmorphism cards, random 3D spheres, generic AI illustrations, fake dashboards, excessive glowing borders, stock office imagery, template-style service sections, fake statistics, fake client logos, fake awards, fake reviews and copy that sounds AI-generated.

The site should feel **art-directed, not template-generated**.

6. DESIGN DIRECTION

Desired aesthetic: **Premium B2B + editorial + strategic + modern technology + distinctive Indian identity**.

Use strong typography, whitespace, data visualization, LinkedIn-inspired visual language, campaign dashboards only where meaningful, audience maps, funnel diagrams and clean motion.

7. UNIQUE UI CONCEPT — THE NEXUS

“Nexus” means a connection or central link. Use this idea throughout the UI.

The visual language should represent connections between:

Audience → Content → Credibility → Ads → Demand → Leads → Pipeline

Create a custom interactive **Nexus Growth Map** that visually demonstrates this system.

8. VISUAL SYSTEM

Typography

Use a distinctive premium typography combination: one strong display font, one readable sans-serif for body text, and optionally a mono font for data/metrics.

Color

Use a restrained palette: deep near-black/charcoal, warm off-white, white, one strong brand accent and one secondary data accent. Avoid rainbow gradients.

Motion

Motion should communicate information: scroll-driven system diagrams, connecting lines, content reveals, campaign journeys and subtle metric animations. Avoid random movement and excessive parallax.

9. WEBSITE INFORMATION ARCHITECTURE

Main navigation: **Home · Solutions · Industries · Case Studies · Insights · About · Let's Talk**

10. SOLUTIONS

Create dedicated pages for:

- LinkedIn Marketing — /solutions/linkedin-marketing/
- LinkedIn Ads — /solutions/linkedin-ads/
- Thought Leader Ads — /solutions/thought-leader-ads/
- B2B Lead Generation — /solutions/b2b-lead-generation/
- Demand Generation — /solutions/demand-generation/
- Founder-Led Marketing — /solutions/founder-led-marketing/
- B2B Marketing — /solutions/b2b-marketing/

Each page must be genuinely useful. Do not create thin SEO landing pages.

11. LOCATION SEO ARCHITECTURE

Rajasthan — /locations/rajasthan/

Target B2B marketing company/agency Rajasthan, LinkedIn marketing Rajasthan, LinkedIn Ads Rajasthan, B2B lead generation Rajasthan and demand generation Rajasthan.

Explain Jaipur headquarters, Rajasthan business relevance, services, industries, local work where verifiable, and India/international reach.

Jaipur — /locations/jaipur/

Create unique Jaipur-specific content rather than duplicating the Rajasthan page.

India — /locations/india/

Target B2B marketing agency India, LinkedIn marketing agency India, LinkedIn Ads agency India, B2B lead generation India and demand generation India.

12. HOMEPAGE

Hero

LinkedIn, Built for B2B Growth.

Saini Nexus helps B2B companies reach the right decision-makers, build credibility and turn LinkedIn into a measurable engine for demand, leads and business growth.

Primary CTA: **Build Your Growth Strategy**

Secondary CTA: **Explore Our Work**

Location signal: Jaipur, Rajasthan · India · Global

Hero interaction

Create a custom interactive Nexus visual that transforms LinkedIn Activity → Audience → Attention → Credibility → Demand → Leads → Pipeline.

13. PROOF SECTION

Headline: **Built Around Business Outcomes.**

Use only verified numbers. Current public information supports 4K+ LinkedIn followers, 11–50 employee company size, Jaipur headquarters, founded in 2024 and LinkedIn Marketing Labs-certified leadership. Verify every number before publication.

14. PROBLEM SECTION

Your LinkedIn Is Active. Is It Actually Driving Growth?

- Visibility without intent
- Wrong audience
- Ads without strategy
- Disconnected campaigns

Then introduce: **Saini Nexus connects the pieces.**

15. SIGNATURE SECTION — THE SAINI NEXUS GROWTH SYSTEM

Create a large interactive visualization with these stages:

01 Positioning → 02 ICP & Audience → 03 Content → 04 LinkedIn Distribution → 05 LinkedIn Ads → 06 Thought Leader Ads → 07 Demand Generation → 08 Lead Generation → 09 Pipeline

Each stage should be clickable and reveal what it means, why it matters, what Saini Nexus does, and relevant services/insights/case studies.

16. SERVICES

The Growth System, Not Just the Channel.

Feature LinkedIn Marketing, LinkedIn Ads, Thought Leader Ads, B2B Lead Generation, Demand Generation and Founder-Led Marketing with concise strategic explanations.

17. CASE STUDIES

Make case studies a high-priority section. Each should contain: Client, Industry, Market, Challenge, Diagnosis, Strategy, Execution, Results, What changed, What we learned.

Never create fake case studies or unsupported performance claims. Use qualitative outcomes when metrics cannot be verified.

18. CASE STUDY VISUAL DESIGN

Use an editorial campaign format rather than generic cards. Example fields: Client/Industry, campaign problem, audience, hook, creative, spend, result and learning.

19. INDUSTRIES

Potential categories: SaaS, Technology, Consulting, Professional Services, B2B Startups, Real Estate, IT Services, Business Services and Growth-Stage Companies. Only include industries where Saini Nexus has genuine experience or intends to serve them.

20. ABOUT

Create /about/ explaining what Saini Nexus is, why it exists, philosophy, team, Jaipur/Rajasthan roots, India + international work, approach and founder.

21. DEV RAJ SAINI ENTITY PAGE

Create /about/dev-raj-saini/ establishing **Dev Raj Saini** → **Founder** → **Saini Nexus**. Include biography, expertise, LinkedIn, Saini Nexus, Saini Prime, media/features, certifications, articles and professional history.

22. INSIGHTS

Build the Insights section as a long-term SEO engine. Main categories: B2B Marketing, LinkedIn Marketing, LinkedIn Ads, B2B Lead Generation, Demand Generation, Thought Leadership, Founder-Led Marketing, B2B Growth and AI + Marketing.

23. SEO CONTENT CLUSTERS

B2B Marketing

Pillar: B2B Marketing: Complete Guide. Supporting topics: strategy, funnel, channels, SaaS, startups, India, Jaipur and Rajasthan.

LinkedIn Marketing

Pillar: LinkedIn Marketing: Complete Guide for B2B Companies. Supporting topics: strategy, company pages, content, audience targeting, India, Jaipur and Rajasthan.

LinkedIn Ads

Pillar: LinkedIn Ads: Complete B2B Advertising Guide. Supporting topics: targeting, Lead Gen Forms, Thought Leader Ads, campaign structure, cost and regional agency queries.

B2B Lead Generation

Pillar: B2B Lead Generation: Complete Guide. Supporting topics: strategy, LinkedIn lead generation, SaaS lead generation and India/Jaipur/Rajasthan topics.

Demand Generation

Pillar: B2B Demand Generation: Complete Guide. Supporting topics: strategy, demand generation vs lead generation, LinkedIn demand generation and regional queries.

24. RAJASTHAN SEO STRATEGY

Become one of the strongest organic search entities for B2B marketing in Rajasthan.

Do not create thin city pages. Instead build a legitimate Rajasthan Marketing Knowledge Hub around B2B Marketing in Rajasthan, LinkedIn Marketing for Rajasthan Businesses, B2B Lead Generation in Rajasthan, Jaipur Startup Marketing and other topics where Saini Nexus has genuine expertise.

25. LOCAL SEO

Maintain consistent business information across the website and Google Business Profile: Saini Nexus, Jaipur, Rajasthan, India. Implement appropriate local/organization structured data only where supported by actual business facts.

26. STRUCTURED DATA

Evaluate JSON-LD page-by-page. Potential schemas: Organization, LocalBusiness where appropriate, WebSite, BreadcrumbList, Article and ProfilePage. Never add unsupported facts to structured data.

27. INTERNAL LINKING

Build a deliberate semantic network between Saini Nexus, B2B Marketing, LinkedIn Marketing, LinkedIn Ads, Demand Generation, B2B Lead Generation, location pages, industry pages, case studies and articles.

28. CONTENT QUALITY

First-hand experience > generic SEO content

Use actual campaign observations, experiments, client problems, screenshots where permitted, lessons, team expertise, founder perspective, LinkedIn observations and original frameworks.

29. AI SEARCH / GEO

Do not create a fake GEO page. Build authoritative, structured, original content with clear headings, direct answers, examples, expert perspective, authorship, citations where appropriate, original research, case studies and internal linking.

30. TECHNICAL REQUIREMENTS

- Semantic HTML
- Fast rendering / crawlable content
- Excellent Core Web Vitals
- Mobile-first responsive design
- HTTPS
- XML sitemap
- robots.txt
- Canonicals
- 301 redirects
- 404 page
- Breadcrumbs
- Optimized images
- Descriptive alt text
- Accessibility
- Google Search Console

- GA4
- Bing Webmaster Tools

31. PERFORMANCE

Target **Lighthouse 90+**, especially Performance, Accessibility, Best Practices and SEO. Do not sacrifice performance for animation.

32. MOBILE EXPERIENCE

Mobile must be treated as a first-class experience: sticky CTA, readable typography, touch-friendly controls, lightweight animation, simplified Nexus visual and no horizontal overflow.

33. CONTACT EXPERIENCE

Let's Build Your B2B Growth Engine.

Form fields: Name, Work Email, Company, Job Title, Website, Country, Marketing Goal, Monthly Marketing Budget, Current LinkedIn Activity, What are you looking for?, Message.

CTA: **Request a Strategy Conversation**

34. CONVERSION STRATEGY

Primary CTA: **Let's Talk**

Secondary CTA: **See Our Work**

Service CTA: **Discuss Your Campaign**

Article CTA: **Talk to a B2B Growth Strategist**

Case Study CTA: **Build Something Similar**

35. FOOTER

Saini Nexus — B2B Marketing & LinkedIn Growth Company — Jaipur, Rajasthan, India. Include Solutions, Company, Locations and LinkedIn.

36. BRAND VOICE

Confident, intelligent, specific, strategic, human, direct and B2B-focused.

Avoid generic phrases such as “passionate about,” “take your business to the next level,” “cutting-edge solutions,” “revolutionize,” “unlock your potential,” “one-stop solution” and similar agency clichés.

37. COPY PRINCIPLE

Say: “We help B2B companies reach buying groups, not just audiences.”

Say: “We optimize campaigns for commercial relevance, not just cheap leads.”

The copy should demonstrate expertise rather than simply claim expertise.

38. COMPETITIVE DIFFERENTIATION

Do not compete mentally with generic Jaipur digital marketing agencies. Own the narrower category: **B2B LinkedIn Growth** with LinkedIn Marketing + LinkedIn Ads + Demand Generation + Lead Generation + Decision-Maker Targeting.

39. UNIQUE UI COMPONENTS

- **Nexus Growth Map** — interactive growth system.
- **Campaign Anatomy** — Audience → Message → Creative → Campaign → Lead → Pipeline.
- **Decision Maker Map** — visual B2B buying-group representation.
- **Campaign Lab** — case studies presented like experiments.
- **Insight Explorer** — filterable editorial interface for B2B, LinkedIn, Ads, Demand, Lead Gen, AI and Strategy.

40. HOMEPAGE VISUAL STORY

LinkedIn activity → Audience intelligence → Strategic positioning → Content + advertising → Demand → Qualified opportunities → Pipeline

The visitor should understand the business model visually without reading every paragraph.

41. ANTI-GENERIC DESIGN RULE

Before implementing any section, ask: “Could this section appear on 500 other AI-generated agency websites?” If YES, redesign it.

Every major section should contain an original visualization, first-hand insight, interactive system, real campaign, unique data, distinctive layout or editorial storytelling.

42. SEO CONTENT RULE

Do not generate 100 AI articles simply to target keywords. Start with 8–12 strong foundational pages, then 20–30 supporting articles, followed by case studies/original research and regional authority content.

43. RAJASTHAN AUTHORITY STRATEGY

Build authority through excellent service pages, Rajasthan-specific expertise, Jaipur presence, case studies, local business signals, expert authorship, digital PR, relevant backlinks, industry partnerships, original research and consistent LinkedIn activity.

44. DIGITAL PR / AUTHORITY

Use LinkedIn, founder content, industry publications, B2B communities, Rajasthan business organizations, interviews, podcasts, events, relevant directories, case-study mentions and partnerships to strengthen the entity: **Saini Nexus → Jaipur → Rajasthan → B2B Marketing → LinkedIn → Demand Generation.**

45. ANALYTICS

Track organic sessions, landing pages, conversions, rankings, Rajasthan/Jaipur/India visibility, branded search, non-branded search, contact submissions, strategy calls, CTA clicks, case-study engagement, scroll depth, internal search, page speed and Core Web Vitals.

46. SEO CONVERSION FUNNEL

Google Search → Relevant landing page → Useful expertise → Case study / proof → Solution → Strategy CTA → Qualified lead

47. CMS / CONTENT SYSTEM

CMS must support Articles, Case Studies, Insights, Industry pages, Service pages and Team profiles with author, dates, categories, related content, related services, breadcrumbs, social images, SEO metadata and structured data.

48. AUTHORSHIP

Every expert article should have a clear author. For Dev Raj Saini, show photo, short bio, expertise, LinkedIn and Saini Nexus relationship.

49. FIRST DEVELOPMENT PHASE

Build first: Homepage, Solutions, LinkedIn Marketing, LinkedIn Ads, B2B Lead Generation, Demand Generation, Case Studies, About, Jaipur, Rajasthan, Insights and Contact.

Do not build 50 pages immediately. Build the foundation extremely well.

50. IMPORTANT SEO WARNING

Do not use “Rajasthan's #1 marketing company” as a factual statement unless independently substantiated. Pursue the ambition through actual SEO and business performance.

Suggested brand direction: “Building the next generation of B2B marketing from Rajasthan.”

51. PRIMARY SEO KEYWORD PRIORITY

Tier 1 — Highest priority

B2B marketing agency Jaipur; B2B marketing company Jaipur; LinkedIn marketing agency Jaipur; LinkedIn Ads agency Jaipur; B2B marketing agency Rajasthan; LinkedIn marketing agency Rajasthan; B2B lead generation agency Rajasthan; Demand generation agency Rajasthan.

Tier 2

B2B marketing agency India; LinkedIn marketing agency India; LinkedIn Ads agency India; B2B lead generation India; Demand generation India.

Tier 3

LinkedIn Ads, Thought Leader Ads, LinkedIn marketing, B2B demand generation, B2B lead generation, Founder-led marketing and SaaS lead generation.

52. FINAL PRODUCT PRINCIPLE

Don't build another marketing website. Build a B2B marketing knowledge and growth platform.

The website itself should demonstrate the marketing intelligence Saini Nexus sells. If Saini Nexus sells strategy → positioning → audience understanding → creative → distribution → demand → pipeline, the website should

embody those same principles.

The website should prove expertise through its UX.

53. FINAL EXPERIENCE

“This feels different.”

“They clearly understand B2B.”

“They actually understand LinkedIn beyond posting.”

“They have a methodology.”

“They have proof.”

“I want to talk to them.”
